

The Florida East Coast Railway Society

Who Are We?

We are a non-profit group of volunteers and hobbyists who share an interest in the Florida East Coast Railway, from its beginnings prior to 1895 through current operations and into the future. Included are history buffs, rail fans and modelers, as well as those who follow the current operations of the F.E.C. railway.

As the F.E.C. is an operating railroad, rather than a fallen flag, we attract anyone with an interest in current rail operations, those interested in model railroading,

photographers and anyone with an interest in a railroad with a living history.

What Do We Do?

Our main event is an annual membership convention. It is here where we hold our annual membership meeting and vote in new directors. We also host guest speakers and have the opportunity to take tours, participate in clinics and meet our fellow F.E.C.R.S. members.

Also at the convention our **FECNTRAK** group assembles their modules and operates a huge layout. They also provide an opportunity for anyone to get out on the miniature mainline and get some running time in.

The modelers among us design layouts patterned after their favorite eras of the F.E.C.; the most notable of these is Cal Winter's incredible Key West Extension layout.

Those interested in the history of the F.E.C. have been doing current research into the construction techniques of the Key West Extension, as well as tracing the lineage of freight houses and depots still standing that might be restored in some of the towns along the line.

The primary benefit of membership in the F.E.C.R.S. is the quarterly Speedway newsletter. It is chock full of articles on current events, historical perspective and

first hand experiences you can get no where else.
